

Everyday in America more of our freedoms are being taken away, from being able to smoke in public places, to eating the food that we want to eat, and now the government wants to get involved in what we listen to. This is setting an extremely dangerous precedent. Americans need to put a stop to this daily intrusion into our public lives, and make their voices heard on all of these things. Satellite radio exists because it offers unprecedented variety. If the current broadcasting stations can't compete, too bad. In capitalism as in the jungle, you adapt or die. The Edsel no longer exists. It is not the business of this government to influence the longevity of a business trend no matter how powerful the lobby.

XM Satellite Radio is here because there is a demand for it! If I choose to listen it is because I want to and I don't want anyone telling me that I can't! Not in a free country!
